

Mogul Style Engines

Recommended Running Tips

- 1. At this time HLW does not recommend running this engine for extended periods of display time more than a few hours with out cool down time for the motor. This applies to pulling heavy loads or multiple units with power pickup trucks that create high drag on motor.**

NOT INTENDED FOR COMMERCIAL USE

- 2. HLW recommends that this engine be given some break-in time in forward and reverse pulling of moderate loads before attempting to run more than 1 ½ to 2 hours at a time with out stopping.**
- 3. HLW has lubricated this unit at the factory and has tested it. It is recommended that you keep the engine drive, connecting rods and axles clean and free from dirt build up. Also one drop of oil at points of movement is recommended after extended periods of weeks or months of use, or when it appears dry of lubricant. This also applies to the tender and rolling stock especially power pickup trucks.**
- 4. This engine performs best on clean track, which keeps the amp load and temperature down on the motor.**
